

# Vulnerability Monitoring

Protection software that monitors your entire IT estate.

## What is Cyber Security?

Cyber Security in simple terms, is putting protection software in place to monitor your entire IT estate from Cyber threats, and allows you to see, in real-time what items and devices are on the network. Knowing what needs to be remediated by patching, quarantining items, and identifying the devices that require ongoing monitoring to ensure assets are covered.

CyberCNS Vulnerability solution is the only platform that empowers you to gain control of customer risks by identifying and prioritising vulnerabilities across their network including traditional, cloud, mobile and DevOps environments.

## The importance of being Cyber Secure

Cyber-attacks can have a significant impact on a business, regardless of size or industry. Organisations should plan for cyber incidents as part of their overall risk strategy. Having cyber security software in place gives you a better chance of mitigating impact, helping with rapid system recovery, and eliminating business downtime.

Here are the latest statistics regarding vulnerabilities:

- Over 17,000 vulnerabilities to date this year
- Over 220,000 vulnerabilities disclosed to date
- Over 20,000 of those vulnerabilities were classified Critical
- Over 50,000 of those vulnerabilities were classified High

# Vulnerability Monitoring

## How ASL can ensure you are protected

Planning doesn't have to be daunting; we can help you to understand the risks and build an effective response plan by:

- ✓ Previewing the Cyber CNS platform and identify your assets
- ✓ Explaining how to review and employ application patching
- ✓ Help you to understand your Microsoft Secure Score
- ✓ Reviewing your Centre Internet Security (CIS) requirements
- ✓ Providing consultancy on your cyber needs

## How much does this service cost?

Contact [sales@aware-soft.com](mailto:sales@aware-soft.com) or call **0345 862 0345** to discuss your business requirements, and a member of our team will provide you with an accurate cost for your business' unique needs.
